

# Information Visualization

## Project Description

---

Using Shiny and R language build a web app dashboard for your selected datasets:

- 1-Search for a real dataset with min 8 attributes.
- 2-Describe the dataset attributes and use suitable statistics for your data and discuss it.
- 3-Apply data cleaning methods if needed
- 4-Apply 3 different data visualization chart.
- 5-Mention your observation.
- 6-Be aware of [UX,UI] of your app.

## Project Deliverables

- 1.Dataset
- 2.code {R script}
- 3.Documentation
